*Last Financials: The date of the most recent financial statements.

P/E (Last): We divide "Current MCap" to "annualized YTD profit".

P/BV (Last): Calculated by dividing "Current MCap" to "BV in its Last Financials".

For P/E calculation, we will use unaudited 2011-year-end financial statements until the companies announce their audited financial statements. Generally, the companies don't announce after tax profit in their unaudited financial statements, so while calculating P/E with unaudited financial statements, we use estimated net profit=(profit before tax) X (1- previous year's effective tax rate)).
