*Average data was calculated according to recent six months, by dividing the total daily trading volume (excluding two highest trading vol.) to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

** Last Financials: The date of the most recent financial statements.

P/E (Last): We divide "Current Mcap" to "annualized YTD profit" For the banking sector, we use "trailing profit" instead of "annualized YTD profit" due to the availability of all financial results required to calculate trailing profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.
