News from Iraq

Politics

- Iraq's Kurdistan Regional Government (KRG) authorized the release of payments to oil exporting companies for November in line with payments made in the past two months, an official said on Monday. - The head of the armed forces in the American Senate, John McCain, discussed with the high officials in Kurdistan Region the needs of the Peshmerga to fight IS terrorists and the following scenarios. Barzani also mentioned that Kurdistan Region intends to improve the relations with the Iraqi government and willing to make any discussions for that purpose. (All Iraq News)

Economics

- Iraq's oil exports rose in November to a decades-high average of 3.37mn bpd, from 2.7mn bpd the previous month, the oil ministry said on Tuesday. Two officials from the state-run South Oil Company (SOC) said the jump in exports was helped by large quantities of crude held in storage due to bad weather the previous month. OPEC oil output has risen in November from the previous month led by a rebound in Iraqi exports, the group's second-largest producer. (Zawya)

*Average data was calculated according to recent six months, by dividing the total daily trading volume (excluding two highest trading vol.) to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

** Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divided "Current Mcap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.
