**News from Iraq**

**Politics**

• The Office of the Prime Minister Haider al-Abadi announced on Wednesday that the latter will travel to China at the head of a senior government delegation to discuss ways of security and military cooperation and the role of Chinese companies in the investment sector. The spokesman for the Office Saad al-Hadithi said that "The aim of the visit is to develop relations between the two countries in addition to discussing China's efforts at the international level with regard to fighting terrorism and drain its resources." (Iraqi News)

**Economics**

• The International Energy Agency confirmed on Wednesday that Iraq's oil production has risen to its highest level in July. The organization added that "The production rose to 4.18mn bpd in June. The Oil Ministry announced previously a rise in the exported quantities of crude oil for the month of July to more than 96mn barrels, pointing out that the earned income rate amounted nearly five billion dollars.

**ISX - Company Announcements**

• **2Q15 (unaudited) financial results:**

\*Average data was calculated according to recent six months, by dividing the total daily trading volume (excluding two highest trading vol.) to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

\*\* Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divided "Current MCap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

\*\*\*When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.

"We use the FX rate given by the bank that Rabee Securities makes its banking transactions while calculating the dollar values in our research reports instead of CBI market FX rate to be more conservative."
