**News from Iraq**

**Politics**

- As Iraqi security forces make progress in the campaign to defeat the ISIS, Canada's vow this week to expand its contributions in the fight is a welcomed commitment, Operation Inherent Resolve spokesman Army Col. Steve Warren said on Wednesday. "Canada will increase its compliment of military personnel to approximately 830," he said. "They will deploy troops at various headquarters to further support planning, targeting and intelligence. As part of these efforts, Canada will deploy medical personnel to train Iraqi medics and to provide medical support to coalition members."

**Economics**

- Germany is making available €500mn (\$566mn) in credit to Iraq which is not earmarked for any specific purpose but the country needs investment in its infrastructure, said Chancellor Angela Merkel on Thursday after meeting Iraqi Prime Minister Haider al-Abadi. (Zawya)
- OPEC's second-largest producer Iraq expects to load 6.9% less Basra crude in March than the previous month, with most of the reduction coming on the heavier grade, trade sources said on Thursday. Iraq plans to export 3.38mn bpd of crude from its southern terminals in March, the sources said, citing a preliminary loading programme for next month, down from a planned 3.63 million bpd in February. (Zawya)
- Norwegian oil firm DNO International plans to increase production at its prize Tawke oilfield in Iraq's Kurdistan region, it said on Thursday, despite security challenges in the region and low crude prices. The firm plans to double its investment to \$100mn this year, most of it in the billion-barrel field, to raise the field's output to 135,000 barrels of oil per day by mid-2016 from 120,000 bopd now. (Zawya)

**ISX - Company Announcements**

\*Average data was calculated according to recent six months, by dividing the total daily trading volume (excluding two highest trading vol.) to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

\*\* Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divided "Current Mcap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

\*\*\*When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.

"We use the FX rate given by the bank that Rabee Securities makes its banking transactions while calculating the dollar values in our research reports instead of CBI market FX rate to be more conservative."
