News from Iraq

Politics

- Iraq's newly elected lawmakers convened on Monday for the first time since the May 12 national election but failed to elect a speaker, the first step in the process of forming a new government. The members of parliament are to elect the speaker and two deputies within a 90-day process outlined in the constitution, but as a result of intense competition between the various blocs, no vote was held on the appointments. Iraq's Parliament on Tuesday, in its second session, could not elect speaker and deputies in the second round of new sessions due to lack of quorum as most of the MPs stayed away from the meeting. September 15 was set for the third session by the temporary speaker Mohammed Ali Zaini aiming to meet needed quorum. A temporary leader in the parliament, which is usually given to the eldest lawmaker until a speaker is elected, will lead the sessions. (Kurdistan 24, NRT tv)
- Parliamentarians for the lists of Patriotic Union of Kurdistan PUK, Kurdistan Democratic Party KDP, Fateh and State of Law went on a strike and boycotted a session of the newly-seated Iraqi Parliament on Monday in protest of the appointment of a different bloc as the largest. It came after the new speaker of the Iraqi Parliament, Mohammad Ali Zinni appointed on Monday the list of al-Aslah al-Bina as the largest parliament bloc, said NRT reporter in Baghdad Umed Mohammed. The bloc contained those of nationalist Shiite cleric Muqtada al-Sadr and outgoing Prime Minister Haider al-Abadi which will be tasked by the Iraqi President to form the government. (E-Kurd Daily)
- Kurdistan Region PM Nechirvan Barzani received on Monday the Norwegian ambassador to Jordan and Iraq, Tone Allers, to discuss the current political developments in the region and Iraq, including the first parliamentary session held on the day. (Bas News)

*Average data was calculated according to recent six months, by dividing the total trading volume (excluding cross transactions) in the last six months to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

** Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divide "Current Mcap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

Iraqi banks started to publish IFRS annual reports starting 2016; however, interim period results are available according to Iraqi accounting rules. As a result, we will continue to depend only on the financial results prepared according to Iraqi accounting rules to be able to work with consistent data till the financial statements for both quarterly and annual data will be available according to IFRS standards.

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.

"We use the FX rate given by the bank that Rabee Securities makes its banking transactions while calculating the dollar values in our research reports instead of CBI market FX rate to be more conservative."
