*If there is a capital increase, this date shows the date when original shares resumed trading.

**Paid-in Capital AFTER the increase shows the capital the company reached / will reach after the completion of the capital increase processes.

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares.

Capital Increase and Cash Dividend Distribution Processes:

The first step in any capital increase or dividend distribution is announcing a General Assembly meeting. All companies have to announce that it will hold its General Assembly meeting 15 days prior to the meeting date. Shares are normally suspended from trading one week before any General Assembly meeting (Please note that the ex-date for capital increases and dividend distributions is referred to as "Trading-Suspension day"). Once a company's General Assembly meets, they vote on the capital increase percentage and how they will raise this amount (bonus/rights). General Assemblies also vote on the percentage of cash dividend distribution. When a company decides to increase its capital through a rights issue, they invite investors to subscribe for the newly offered shares. Subscription period is normally 30 days (the first 15 days is for the existing shareholders, the second 15 days for everyone else) that could be extended to 60 days if the offered shares are not fully subscribed. The Iraqi Company Registrar has to approve the capital increase (in both cases, bonus and rights issue). For cash dividend distribution, most companies decide to distribute cheques with the cash dividend amount and shareholders can go to a specified location to receive these cheques, usually banks. There is not strict timeline for this procedure; therefore, the process could take long time.

*As of 27/02/2014

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.
