**News from Iraq**

**Politics**

• Fuad Masum, the President and Osama al-Nujaifi, the Vice President have agreed to hold an expanded meeting of the political blocs and decision-makers and opinion to stop the problems facing the country. According to a statement issued by Nujaifi's Office, the latter met on Sunday evening, the President and discussed with him the political and security situation, the future of the political process and the solutions put forward to address the existing problems so as to ensure the interests of the Iraqi citizen and insure determination to defeat the challenges, especially in the confrontation with IS terrorists. (Shafaq News)

**Economics**

• Minister of Industry, Trade and Supply, Maha Ali, confirmed on Sunday that the Jordanian exports stranded inside the Iraqi territories have started entering Iraqi markets and reaching their destination. The minister told that the Iraqi market is one of the most important destinations for Jordanian exports, despite the fact that these exports fell by 25% during the first four months of this year due to turmoil there. \*Average data was calculated according to recent six months, by dividing the total daily trading volume (excluding two highest trading vol.) to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

\*\* Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divide "Current Mcap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

\*\*\*When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.

"We use the FX rate given by the bank that Rabee Securities makes its banking transactions while calculating the dollar values in our research reports instead of CBI market FX rate to be more conservative."
