News from Iraq

Politics

- Security and political challenges facing Kurdistan as well as US assistance to Erbil were the focus of talks at a Washington meeting Tuesday with Kurdistan Region President Massoud Barzani, President Barack Obama and Vice President Joe Biden, the White House said in a statement. The leaders discussed a range of issues, including the campaign to degrade and ultimately destroy IS and the status of ongoing political initiatives to address the needs of the Iraqi people and foster cooperation across all communities in the war-torn country, said a statement released after the talks. (Rudaw)
- Iraqi President Fuad Masum will lead a delegation to Iran next week to discuss the latest security developments in the region and boost economic ties, the president's spokesman said. "The environment and trade ministers are among the delegation expected to accompany the president in an official visit to Iran that will take place May 12," spokesman Khalid Shwani said on Wednesday. (Rudaw)

Economics

- Iraq has requested financial assistance from the International Monetary Fund (IMF) and agreement may be reached within weeks on a loan of about \$800mn (529mn pounds), a senior IMF official said. Iraqi finances have been hit hard by the plunge of oil prices since last year as well as by the Islamic State insurgency. The government has projected a budget deficit of about \$25bn this year, in a budget of some \$100bn. (Zawya)

*Average data was calculated according to recent six months, by dividing the total daily trading volume (excluding two highest trading vol.) to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

** Last Financials: The date of the most recent financial statements.

P/E (Last): For banking sector, we divided "Current Mcap" to "trailing net profit" while calculating P/E (Last), when the recently announced financial statements are for the interim period. For other listed companies, we divided "Current MCap" to "annualized YTD profit" while calculating P/E (Last), when the recently announced financial statements are for the interim period. While calculating annualized YTD profit, we adjusted unaudited profit before tax values by deducting 15% income tax.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.
