- On Saturday, Iraqi Volunteer Forces spokesman, Karim al-Nawawi stated "About 60 percent of Baiji's refinery has fallen in the hands of the security forces and al-Hashed al-Sha'bi; while IS cannot hold any ground," pointing out that, "This dawn, IS militants had carried out an attack on the Hamrin Mountains area before they were pushed back and attacked again." (Iraqi News)

\*Average data was calculated according to recent six months, by dividing the total daily trading volume (excluding two highest trading vol.) to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

\*\* Last Financials: The date of the most recent financial statements.

P/E (Last): For banking sector, we divided "Current Mcap" to "trailing net profit" while calculating P/E (Last), when the recently announced financial statements are for the interim period. For other listed companies, we divided "Current MCap" to "annualized YTD profit" while calculating P/E (Last), when the recently announced financial statements are for the interim period. While calculating annualized YTD profit, we adjusted unaudited profit before tax values by deducting 15% income tax.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

\*\*\*When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.
