News from Iraq

Politics

- The United States and its coalition partners targeted IS in 26 air strikes in Saturday's round of daily attacks on the militant group in Iraq and Syria, the Command Joint Task Force said in a statement on Sunday. Seventeen of the strikes were in Iraq, with the greatest concentrations near the cities of Baiji, Mosul and Ramadi, where tactical units, buildings, fighting positions, weapons and vehicles were hit. The strikes also hit IS forces near four other Iraqi cities, the statement said. (Alliraq News)
- Turkey's government is seeking to extend for one more year a parliamentary mandate that allows the military to combat Islamist militants and Kurdish militants in neighboring Syria and Iraq, a foreign ministry official said on Friday. The current mandate under which the Turkish armed forces launched airstrikes in Iraq and Syria expires on October 2, the official told AFP on condition of anonymity. (Alliraq News)
- Iraqi Foreign Minister Ibraheem al-Jaffari called on Sunday in a press conference his Norwegian counterpart Børge Brende to reopen the embassy of Norway in Baghdad. (Alliraq News)

Economics

The new plant will pump up 220Km³ of water from a branch of the river Euphrates, which will then be processed into drinking water, fed to a pipework, and distributed to end-consumers via nine pumping stations. *Average data was calculated according to recent six months, by dividing the total daily trading volume (excluding two highest trading vol.) to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

** Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divided "Current MCap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.
