News from Iraq

Politics

- State of Law Coalition President Nouri al-Maliki has 'called' for an early election in Iraq, which he felt, is a way to get out of the current political crisis. He further hoped to receive majority during the elections and called for the formation of a joint supreme body to strengthen relations between Iraq and Iran. (Iraqi News)
- Nineveh Operations Command announced liberating four villages south of Mosul from ISIS control and raising the Iraqi flag over the buildings. (Iraqi News)

Economics

- Iraq started operating a new natural gas processing plant for oil fields in the southeastern region on Sunday as part of a plan to use gas that was previously flared to generate electricity, the oil ministry said in a statement. The plant located in Misan province, on the border with Iran, will process gas associated with crude pumped at the Fakka and Bazargan fields, it said. (Trade Arabia)
- Iraq has reached an agreement with the major oil companies like British Petroleum, Shell and Lukoil to restart stalled investment in oil fields that the companies are developing and allowing projects that were stopped this year. (Iraqi News)

*Average data was calculated according to recent six months, by dividing the total daily trading volume (excluding two highest trading vol.) to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

** Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divided "Current MCap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.

"We use the FX rate given by the bank that Rabee Securities makes its banking transactions while calculating the dollar values in our research reports instead of CBI market FX rate to be more conservative."
