**News from Iraq**

**Politics**

- The Prime Minister, Adel Abdul Mahdi, received head of the UN Mission in Iraq, Jan Kubic. During the meeting, they discussed political and security situation in the country, stability and reconstruction operations and future UN programs in Iraq. (Pmo.iq)
- The President, Barham Salih, received at the Peace Palace on Sunday the Ambassador of the Republic of Armenia to Iraq, Karen Krikorian. President Barham Saleh stressed the depth of the historical relations between the two friendly countries, stressing Iraq's keenness to develop them in all fields. For his part, the Armenian ambassador expressed his country's readiness to contribute to the reconstruction of Iraq. (Presidency.iq)
- The Kurdistan Regional Government (KRG) would abide by the decisions the Iraqi federal government will make to draw a roadmap for dealing with the US sanctions against Iran, said KRG spokesperson Safin Dizayee. (Bas News)

**Economics**

- ABB is reportedly targeting 2024 for the completion of energy projects in Iraq. Its managing director for the Middle East, Mostafa Al Guezeri, said that the Swiss-Swedish company is in the planning stage for its \$1.2-bn work in the country. He added that the company was committed to spending more on Iraq by helping the country access finance, saying "Iraq is one of the most important countries for us." (Iraq Business News)
- Kurdish Natural Wealth Ministry disclosed renovating its oil pipeline to reach 1 mn bpd, instead of 700.000 bpd at the present time. The real Kurdish oil exports, currently, reached to 400.000 bpd, the ministry added. Kirkuk oil exports are stopped since the control of the central government in Baghdad last year, in response for the independence referendum made by the region, despite the opposition of Turkey, Iran and some European countries. The Kurdish pipeline was built after the destruction of Kirkuk oil pipeline by ISIS organization during its occupation in 2014. (Iraq Trade Link)

Source: Iraq Stock Exchange

\*Average data was calculated according to recent six months, by dividing the total trading volume (excluding cross transactions) in the last six months to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

\*\* Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divide "Current MCap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

Iraqi banks started to publish IFRS annual reports starting 2016; however, interim period results are available according to Iraqi accounting rules. As a result, we will continue to depend only on the financial results prepared according to Iraqi accounting rules to be able to work with consistent data till the financial statements for both quarterly and annual data will be available according to IFRS standards.

\*\*\*When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.

"We use the FX rate given by the bank that Rabee Securities makes its banking transactions while calculating the dollar values in our research reports instead of CBI market FX rate to be more conservative."
