News from Iraq

Politics

- The President, Barham Saleh, visited on Friday the former President Fuad Masum. During the meeting, they discussed the latest security and political developments in the country and the importance of consultation and coordination among the political forces on the merits of the next stage. (Presidency.iq)
- President of the Kurdistan Democratic Party (KDP) Masoud Barzani on Saturday received an Iraqi delegation led by parliament speaker Mohammed al-Halbousi to discuss political developments in Iraq and other issues concerning Erbil and Baghdad. The two sides talked about the ongoing efforts to form a government in Baghdad, "particularly the process of cabinet formation," a statement on Barzani's website said. In another part of the meeting, Halbousi and Barzani underlined the need for Iraq to address the issue of displaced people and reconstruction in liberated areas which have yet to take place. (Kurdistan 24)
- The ruling Kurdistan Democratic Party (KDP) will hold a chain of meetings with other Kurdistan political parties this week ahead of the establishment of a new cabinet in Erbil, an official said on Saturday. (Bas News)

Economics

- Cargo trucks will be able to cross the Jordan-Iraq border once again starting March 2019, according to Mohammad Kheir Al Dawoud, president of the Jordan Truck Owners Association (JTOA). The JTOA says the decision would likely help lower the prices of goods, as the loading-unloading process requires extra workers and trucks as well as more time. (Jordan Times)
- Dana Gas, the Middle East's largest regional private natural gas company, announces that as a result of the ramp up of production from its debottlenecking project in the Kurdistan region of Iraq, its group production reached 70,000 bpd on November 19 and has since been sustained above that level.
- The United Nations Development Programme (UNDP) jointly with the Iraqi Ministry of Planning (MoP) organized a consultation session for Director Generals from the Ministry of Higher Education and the MoP, to discuss and develop a road map to institutionalize the Regulatory Impact Assessment as an evidence-based approach, and tool for policy making. (Iraq Business News)

*Average data was calculated according to recent six months, by dividing the total trading volume (excluding cross transactions) in the last six months to total number of trading days (excluding the No. of days share were suspended due to GA or by ISC).

** Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divide "Current MCap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

Iraqi banks started to publish IFRS annual reports starting 2016; however, interim period results are available according to Iraqi accounting rules. As a result, we will continue to depend only on the financial results prepared according to Iraqi accounting rules to be able to work with consistent data till the financial statements for both quarterly and annual data will be available according to IFRS standards.

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.

"We use the FX rate given by the bank that Rabee Securities makes its banking transactions while calculating the dollar values in our research reports instead of CBI market FX rate to be more conservative."
