\*Average data was calculated according to the recent twelve months, by dividing the total trading volume in the last twelve months by the total number of trading days (excluding the No. of days shares were suspended due to GA or by ISC).

\*\* Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last) for the banks, we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the other sectors, we divided "Current MCap" to "annualized YTD profit," while calculating P/E (Last) (because it is not possible to calculate trailing profit for some companies due to lack of information). We adjusted unaudited profit before tax values for annual results until the company publishes audited annual results by deducting 15% income tax.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

\*\*\*When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.

"(UCM)": Undisclosed Companies Market: The companies which have been suspended from trading due to not disclosing their financial statements by ISC resumed trading on Jul. 3, 2022 in a platform called "Undisclosed Companies Market" with the aim to protect the rights of shareholders in joint-stock companies listed on the ISX. The price change limit for the daily transactions is at +/- 5%"

"We use the FX rate given by the bank that Rabee Securities makes its banking transactions while calculating the dollar values in our research reports instead of CBI market FX rate to be more conservative."
