Iraq Stock Exchange

- Moody's has assigned first time local currency long-term/short-term deposit ratings of B3/NP for National Bank of Iraq (BNOI), and foreign currency long-term/short-term deposit rating of Caa1/NP. All long-term deposit ratings carry a stable outlook. Deposit ratings takes into consideration the Moody's expectation of high level of support from the parent bank, Capital Bank of Jordan. BNOI's Caa1 foreign currency deposit rating is capped by the country's foreign currency ceiling. NBI's caa2 BCA reflects Moody's expectations that the bank will maintain its strong funding profile and liquid buffers, supported by relatively solid risk management and corporate policies in line with the parent's practices. These strengths are balanced by weak levels of capitalization pressured by rapid asset growth, volatile bottom-line profitability and high borrower and deposit concentrations which could increase the bank's vulnerability at times of stress, notably in a difficult operating environment. (Moody's)
- Kuwait Finance House (KFH) has acquired 97.3% of Bahrain's Ahli United Bank (AUB) at a value of \$10.9 billion (KWD 3.4 billion), according to a statement issued Sunday by SICCO, an asset manager that acted as the cross-listing advisor on the deal. AUB is the major shareholder at Commercial Bank of Iraq (BCOI) with 80.3% share. (Forbes Middle East)
- Asia Al Iraq Islamic Bank for Investment (BAIB) resumed trading on Sep. 26 after being suspended from trading for its AGM (Sep. 20) in which they discussed and approved 2021 annual financial statements.
- Gulf Insurance and Reinsurance (NGIR) resumed trading on Sep. 26 after holding its AGM (Sep. 18) in which they discussed and approved 2021 annual financial statements.

*Average data was calculated according to the recent twelve months, by dividing the total trading volume in the last twelve months by the total number of trading days (excluding the No. of days shares were suspended due to GA or by ISC).

** Last Financials: The date of the most recent financial statements.

P/E (Last): While calculating P/E (Last), we divided "Current Mcap" to "trailing net profit" when the recently announced financial statements are for the interim period. For the companies which trailing profit cannot be calculated due to lack of information, we divided "Current Mcap" to "annualized YTD profit," while calculating P/E (Last). We adjusted unaudited profit before tax values by deducting 15% income tax, while calculating annualized YTD profit.

P/BV (Last): Calculated by dividing "Current Mcap" to "BV in its Last Financials".

Iraqi banks started to publish IFRS annual reports starting 2016; however, interim period results are available according to Iraqi accounting rules. As a result, we will continue to depend only on the financial results prepared according to Iraqi accounting rules to be able to work with consistent data till the financial statements for both quarterly and annual data will be available according to IFRS standards.

***When the original shares resume trading, we start using the number of shares that the company will reach after the capital increase with the assumption that the capital increase was reflected to the price of the shares. We use the new capital in calculating Mcap.

Note: "Suspend/ISC" companies are not trading due to ISC Instructions.

"Suspend/GA" companies are not trading due to General Assembly Meetings.

"(NR)": These are the companies which are trading in the Non-Regular market (in compliance with Iraq Securities Commission law numbered 132/9 on 20/12/2012). These companies were moved to the secondary market (non-regular) because of the decrease in their trading volume and the number of days that these companies are being traded for. Please note, according to the Regulations of the Secondary Market, in each trading session, the average share price will be calculated for each share. The maximum increase and decrease of +/- 20% will be based on the average price in the previous session. The price should be valid during three effective trading sessions after the listing, and it will be free in the first trading session after capital increasing.

"(UCM)": Undisclosed Companies Market: The companies which have been suspended from trading due to not disclosing their financial statements by ISC resumed trading on Jul. 3, 2022 in a platform called "Undisclosed Companies Market" with the aim to protect the rights of shareholders in joint-stock companies listed on the ISX. The price change limit for the daily transactions is at +/- 5%"

"We use the FX rate given by the bank that Rabee Securities makes its banking transactions while calculating the dollar values in our research reports instead of CBI market FX rate to be more conservative."
